As a Bed Bug Pest Control company, we often have a need to identify the presence of bed bugs in our commercial and residential client properties. It is important to Green Heat Purification, and our valued client base that the integrity and accuracy of our inspections be absolutely professional, courteous and thorough.

At Green Heat Purification we made a decision to sub-contract out our Dog Detection services to a third party company. We chose this business model as we do not want our customer base to ever have the suspicion that our Dog Detection introduces the possible conflict of interest and potential false positive alerting for the purpose of dishonest gain. Therefore, the Bed Bug Detection Company that we use must represent our business, and portray the same values and customer service that our own staff and management deliver.

We have chosen to sub-contract with Elite Detection Dogs and they have been a valued and extremely important extension of Green Heat Purification. Elite Detection Dogs, and specifically Sherri Hall have been incredibly responsive to our commercial needs, and have demonstrated professional, friendly and reliable detection services. All clients that have been serviced by Elite Detection Dogs have been impressed with the service, and make sure they let us know how happy they are with the detection services.

Our relationship with Elite Detection Dogs is strategic and critical to the success of our business. We would like to thank you for all of your hard work and dedication to providing professional, friendly and thorough detections. Keep up the great work.

Sincerely,
